THE INSTITUTE OF GOVERNMENT, an integral part of The University of North Carolina at Chapel Hill, is devoted to teaching, research, and consultation in state and local government.

Since 1931 the Institute has conducted schools and short courses for city, county, and state officials. Through guidebooks, special bulletins, and a magazine, the research findings of the Institute are made available to public officials throughout the state.

Each day that the General Assembly is in session, the Institute's Legislative Reporting Service reports on its activities for both members of the legislature and other state and local officials who need to follow the course of legislative events.

Over the years the Institute has served as the research agency for numerous study commissions of the state and local governments.

A total of 350 copies of this public document were printed by the Institute of Government, The University of North Carolina at Chapel Hill, at a cost of $71.68, or $.20 per copy. These figures include *only* the direct costs of reproduction. They do not include preparation, handling, or distribution costs.
